1/8	119x71mm +5mm	475.00
1/8	57x146mm +5mm	475.00

Meditsiiniuudised is a newspaper, which keeps an eye on Estonian health care and on the activities of the medical community. In the publication that is issued every other week, we write about current events and news. In each issue we analyze the problems in the medical area, introduce one person more closely, forward the views of opinion leaders, and mediate recommendations on how to better organize work. Under the heading 'Focus' we share the information necessary for the work of medical specialists. In our portal [www.mu.ee](http://www.mu.ee), we offer plenty of topical news that doesn't make its way to the printed newspaper. There, you can share your comments with others, and you can read the views of our editors in the blog of Meditsiiniuudised. The independent newspaper Meditsiiniuudised catering for physicians and pharmacists appears on the A3 size coated paper, and throughout in color.
